

VILLAGE GREEN SEED

GREAT SEED . . . GREAT RESULTS

Features

Dark green Colour
Very fine texture
Dense growth habit
Very high performance variety

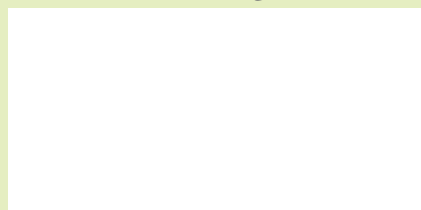

Benefits

Very good disease resistance
Excellent winter performance and recovery
High shoot density for quick wear recovery
Can be mown extremely low
Resists stemminess look due to its fine texture and low mowing capabilities

Seeding Rates

30-50g per sqm
3-5kg per 100sqm
300-500kg per Ha

Distributed by:

MUSTANG

Turf Ryegrass

Mustang Rye is a fine textured rich green coloured variety with excellent seedling vigour.

Mustang is an excellent choice for turf situations where a top performing ryegrass is required. This includes golf courses, sports fields, large lawns or turf farms.

Mustang's extremely fine texture and dark green colour along with its heat, shade and drought tolerance make it hard to beat.

Mustang also has very strong winter growth characteristics in temperate climates.'

Mustang's dark green colour

Mustang also has exceptional disease resistant qualities which helps it persist in stressful summer conditions even in lower maintenance situations.

Mustang can be interseeded into existing cool season grass swards and also provides a stunning winter colour when used in winter overseeding of couch or Kikuyu. Because **Mustang** can withstand extremely low mowing it is also an excellent choice for show lawns.
