

Organic Booster 4-3-2

ORGANIC PELLETISED FERTILISER

Pelletised, composted organic poultry based fertilizer for use wherever it is appropriate to apply an organic fertiliser.

Organic Booster is useful as part of a renovation programme or as stand alone applications to correct deficiencies. Use it to lift organic matter and nutrient holding capacity. Help break up clay soils with regular use of Organic Booster

Use in sand profiles to lift organic matter during renovation or new establishment. **Organic Booster** is essential for couch establishment and to break dormancy.

Organic Booster offers many benefits:

- Couch establishment
- Breaking couch dormancy
- Lifts CEC in sand profile turf.
- Improved moisture retention in sand.
- Aid with clay break down
- Use to improve soil structure
- Improved root development

Applications

Apply prior to rainfall or wash in after application enable particle breakdown.

Cool Season grasses:

Renovation: Apply 5kg/100m² (500kg/ha)

New Establishment: Apply 50kg/100m² and incorporate into top 100mm

Established Turf: Apply 4kg – 10kg per 100m² (400kg-1000kg per hectare) as required.

Warm Season grasses:

Renovation or to break dormancy: Apply 5kg/100m² (500kg/ha)

New Establishment: Apply 50kg/100m² and incorporate into top 100mm.
